## Kisan

Represents hard work, dedication, and the backbone of agriculture

## Hal

Symbolizes traditional farming methods and sustainable agriculture.

## Cow

Represents purity, prosperity, and the significance of livestock in farming.

## Field

Denotes fertility, growth, and the importance of rich farmlands.

## Rising Sun

Stands for a new dawn, progress, and agricultural development.

## Tulsi Plant

Symbolizes purity, medicinal value, and a connection to nature.

## Semi-Circular Layout

Represents unity, completeness, and the ecosystem of farming.

Cultivating Innovation, Nurturing Growth

# Futaav

## Cow Based Tech

Futaav is an extraordinary product made with cow based tech, where Sun light concentrated cow urine with red color wavelength which have highest amount of nano energy use as a base with crop enhancing amino acid, seaweed, vitamins and enzymes.

### Benefits

- Enhances crop growth by providing essential amino acids for protein synthesis.
- Improves soil fertility and nutrient absorption through seaweed extracts.  
Boosts plant immunity and stress tolerance with fulvic acids.
- Promotes sustainable and organic farming practices.

### Target Crops

- All types of grains, vegetables, fruits and Suitable for flower cultivation.

POROSOIL

# POROSOIL

## Soil Recharger

Porosoil is a high-performance soil softener formulated with a unique blend of organic acids and soil-conditioning agents. It works by breaking down compacted clay, increasing porosity, and allowing better air and water circulation.

### Benefits

- Promotes overall plant development and vigor.
  - Effectively reduces fungal infections in crops.
  - Minimizes bacterial infestations, ensuring healthy plants.
- Safe for the environment and promotes sustainable farming.
- Strengthens plants' resistance to diseases naturally.

### Target Crops

- Chilly, Tomato, Papaya, Wheat, Maize, Corn, Millet, Rice, Soyabean, Grams, vegetables, fruits and flowers

# Keetolix

## Botanical Insecticide

**Keetolix** is a bio-insecticide, has been manufactured using the Japanese maceration method from the juice of various types of wild plants. It contains Neem, Karanj, cedar oil and extracts of garlic, besharam, basil, lemon grass.

### Benefits

- Promotes overall plant development and vigor.
- Effectively reduces fungal infections in crops.
- Minimizes bacterial infestations, ensuring healthy plants.

Safe for the environment and promotes sustainable farming.

- Nanotechnology ensures efficient nutrient delivery and absorption.

### Target Crops

- moong, soybean, pigeon pea, urad, peas, gram, paddy, wheat, maize, grains, vegetables and fruits.

# Larashield

## Bio Larvicide

**Larashield** is bio-insecticide is made from wild plants like Neem, Karanj, Vanatulsi, Adusi, Gokhru, and Besharam. that penetrates the plant system to effectively kill pests such as stem borer, fruit borer, leaf miner, looper, and semi-looper, caterpillar, fall army worm, pink bol worm, brinjal fruit borer

### Benefits

- Kills larvae causing damage to crops like stem borer and fruit borer.
- Controls pests like leaf miner, looper, and semi-looper caterpillar, especially in soybean crops. Penetrates the plant system for effective pest management.
- Derived from wild plants, ensuring eco-friendliness and safety.

### Target Crops

- Wheat, maize, paddy, soybean, gram, cotton, fruits, vegetables etc.

# Micro N Star

## An Elixir for Crop

**Micro N star** mixture of microelements, amino acids, and organic acids is prepared using bio-leaching technology, chelating elements like zinc, magnesium, manganese, iron, copper, sulphur, boron, molybdenum, and amino acids with organic matter.

### Benefits

- KSUPPLIES essential microelements required for plant growth and development.
  - Enhances nutrient uptake and utilization by plants.
  - Improves plant immunity and resistance to abiotic stress.
- Promotes chlorophyll production, boosting photosynthesis and crop yield.

### Target Crops

- Suitable for cultivation of all types of grains, vegetables, fruits and flowers.

# Mitti Ras

## Culture Kit

**Mitti Ras** is an Lyophilized dextrose based culture with 30 highly potential soil microbes collected from various forest soil and desi indigenous cow & bull dung. advanced bio-enhancer designed to revitalize soil health by introducing a diverse range of beneficial microorganisms.

### Benefits

- Strengthens plant immunity against soil-borne diseases
- Promotes root development through Mycorrhiza and beneficial bacteria
- Sustainable & organic, ensuring long-term soil health Enhances soil fertility by enriching microbial life

### Target Crops

- moong, soybean, pigeon pea, urad, peas, gram, paddy, wheat, maize, grains, vegetables and fruits.

NEEMOLIX

# Neemolix

## Bio- Insecticide

**Neemolix** 10K is a Neem oil-based bio-insecticide containing 10,000 ppm Azadirachtin, an active compound that disrupts the growth and reproduction of pests.

### Benefits

- Effectively controls a wide range of pests such as aphids, whiteflies, and caterpillars.
  - Disrupts the life cycle of insects, including feeding, molting, and reproduction.
- Safe for beneficial insects like pollinators and does not harm the environment.
- Provides long-lasting protection against pest infestations.

### Target Crops

- Moong, soybean, pigeon pea, urad, peas, gram, paddy, wheat, maize, grains, vegetables and fruits

PURESHIELD

# Pureshield

## Plant Based Fungicide

**Pureshield** botanical fungicide is made from sesame leaves, marigold, ginger, wild chrysanthemum etc. with triple layer ultra sound technology, here it is very effective on fungal diseases of crops. And completely safe for the environment.

### Benefits

- It protects crops by destroying disease-causing fungi
  - increases the nutrient absorption capacity of crops.
  - Quickly effective, it destroys chemical pesticides in the soil and makes it healthy.
- Effectively control wilt disease in chilli plant and cotton plant

### Target Crops

- Chilly, Tomato, Papaya, Wheat, Maize, Corn, Millet, Rice, Soyabean, Grams, vegetables, fruits and flowers

# Vector

## Lysozyme based Liquid

**Vector** is an anti virus product manufactured by nano technology which is completely organic, it is made from bacteria and animal enzymes and metallic nano particles, which controls all types of viruses affecting crops.

### Benefits

- Helpful in preventing leafcurl virus in crops yellow mosaic virus in pulses and oilseed crops.
- Helpful in prevention of bacterial diseases in crops.
- Helpful in leafcurl virus of chilli, tomato and papaya etc.

Helps reduce the dependency on synthetic chemical pesticides.

### Target Crops

- All chilli, tomato, cotton, papaya, moong, urad, soybean fruits and vegetables etc.

ROOT VITAL

# Root Vital

## Mycorrhiza Biofertilizer

**Root Vital** is a bio-fertilizer made from endo and ecto mycorrhizae, it is a nano technology based product which helps in providing nutrition to the roots by providing rapid growth.

### Benefits

- The nutritional capacity of the plant and soil water storage increases.
- Soil found insoluble nutrients Dissolves it and gives it to plants.  
Improves plant immunity and resistance to abiotic stress.
- Makes antibiotics for crops thereby preventing bacterial diseases It makes hard soil soft

### Target Crops

- moong, soybean, pigeon pea, urad, peas, gram, paddy, wheat, maize, grains, vegetables and fruits.
